To

B.Ramaswamiah, Esq., B.A.,B L ,
Secretary to the Government of
His Highness the Maharja of Mysore,
B A N G A L O R E

Sir,

As directed in paragraph 9 of Government Order No. 5905-10/ML. 95-17-5 dated the 20th April 1918, I have the honour to submit herewith for orders a comprehensive programme of works of the Trust Board for the Improvement of the City of Mysore for the 5 years 1918-19 to 1922-23 together with an explanatory memorandum on it. Two statements also accompany.

2. Paragraphs 2 and 3 of the memorandom deal with works of improvement carried up to end of 1917-18, and paragraphs 4 to 8 with works, included in the programme for the 5 years 1918-19 to 1922-23. The remaining portion of the memo treats of works contemplated and for which Estimates are either pending sanction of Government or where projects are being matured, these are not included in the programme.

3 It is proposed to treat the case of the re-productive works separately on receipt of orders on the application for sanction to the loan of rupees 10 lakhs for carrying out such works, submitted with this office letter No 838-5 128/C 427 of 16-17 dated the 27t May 1918, and subsequent references

I have the honour to be,
Sir,
your most obedient servant,

Chairman

MEMORANDUM.

In compliance with the directions contained in paragraph 9 of Government Order No. 5905-10/ Mi. 95-17-8 dated the 20th April 1918, the accompanying programme has been got up of works of the Trust Board for the City of Mysore to be taken up during each of the 5 years commencing from 1918-19, together with the amounts to be allotted to each. This memorandum explains the same, with a few remarks regarding the work of the Trust Board up to the commencement of 1918-19.

Works during the period 1903 to 1910-11

2. For the purpose of removing the slums and thinning congestion in the city of Mysore, for opening additional roads and conservancy lanes, for affording better drainage facilities and for forming extensions, a series of Improvement schemes, with a total estimated cost of Rs. 27,0..,634/- was sanctioned by Government from time to time since the formation of the Trust Board for the Improvement of the City in December 1903, up to the end of the official year 1910-11

During this period, the above estimates were worked out to the extent of Rs 22,24,134/- Omitting the savings anticipated out of the estimates, there still remained work to the extent of Rs. 2,86,861/-, to be carried out to complete these schemes

1911-12 to 1917-18,

3. During the next period from 1911-12 to 1917-18 additional Improvement Schemes were sanctioned, the total amount of the estimates for which being Rs. 54,70,259/- adding the balance of the outlays in connection with the estimates

(18

the estimates sanctioned prior to 1911-12, and deducting the expenditure incurred from 1911-12 to 1917-18 and taking into account the further savings in the estimates for completed works, the net amount that remained to be worked out at the beginning of 1918-19 amounted to Rs. 39,76,470/-. This amount is made up of the following -

Details as per para 6 of G O No 5905-10 dt 20th Dec 1917 are not furnished with the Chairman's due from the Chairman

Vide Statement A

Productive Works-

Devaraj Market Square Improvement Opening out Filter bed extension and	12,21,305/-
Non-Productive Works.	22,55,168/-

4. In framing this programme, the works of productive character are excluded, and as regards the others, only those works, the detailed estimates for which have received the formal sanction of Government, up to the middle of July 1918, have been taken into consideration, the works which have been completed and on which no further outlay is found necessary being left out

On this basis the extent of work under the several sanctioned schemes of a nonproductive nature remaining to be executed during the 5 years 1918-19 to 1922-23 is estimated to cost Rs. 22,55,168/- as particularised in the appended statement, (A)

5. Compared with the figures given in paragraph 7 of the Government Order under reference based upon the statements furnished with this office letter No. 244-5.58-6 46 of 1917-18 dated the 8th November 1917, the amount of outlay that remained to be incurred on the sanctioned works at the end of the year 1917-18, as entered in

in the above mentioned statement (a) shews an increase of Rs. 5,85,029/- under the head "Acquisition of properties" and a decrease of Rs. 16,81,852/- under "construction works including drainage or in all, a net decrease of Rs. 10,96,823/- This is due to

(i) The elimination from the consolidated balance shown in the original programme of

(a) Rs. 6,55,116/- as being the balance of the estimated amounts for certain works, the detailed projects for which, have not yet been formally sanctioned by Government

(b) Rs. 5,76,852/- balance of the estimate amounts for certain works of productive character, and

(c) Rs. 3,29,121/- being the provision for establishment and other incidental recurring charges, and for special works requiring the sanction of Government year to year.

(ii) The reduction of the original balance to the extent of Rs 3,62,578/- on account of both the current year's outlay and the anticipated savings for the future in respect of certain sanctioned works comprised in the original programme.

(iii) The curtailment of the old balance to the extent of Rs. 3,82,792/- consequent on the rectification of certain figures in the

(20)

in the original programme and

(iv) The addition of Rs. 11,99,636/- to the original balance being the aggregate amount of estimates sanctioned by Government subsequent to the preparation of the original programme, less the amount of expenditure incurred thereagainst during the year 1917-18.

6. The amount of Rs. 22,55, 165/- or Rs. 22,55,000 in round figures which is now made out to be the actual balance of outlay remaining to be incurred on the sanctioned non-productive works of the Trust Board at the commencement of 1918-19 may be broadly classified under the following heads -

(1)	Acquisition of the remaining properties in the Fort.	Rs 10,60,000
(2)	Acquisition of properties in other parts of the City. ..	Rs 5,76,000 ~~Rs. 3,83,000~~
(3)	Underground sewerage works.	Rs. 2,88,000
(4)	Open surface drains	Rs 10,000
(5)	Building works	Rs. 2,09,000
(6)	Works of public conveniences or attractions of the city	Rs 16,000
(7)	Extensions	Rs 59,000
(8)	Miscellaneous works	Rs 41,800
	Total	Rs 22,55,000

How the cost of the several works included in the above, is proposed to be met during the 5 years commencing from 1918-19, out of the annual grant of Rs. 4½ lakhs sanctioned in Government Order No 5905-10/Ml 95-17-5 dated the 20th April 1918, is exhibited in the accompanying Programme.

(21

7. The lines on which the above Programme has been drawn up and the points that have entered into consideration in its preparation are noted below:-

(i) A sum of Rs. 2 lakhs is set apart every year out of the annual grant of Rs. 4½ lakhs solely for improvement works in the Port according to instructions contained in paragraph 6 of the Government Order of 20th April 1918, under reply.

(ii) A lump sum provision of Rs. 25,000 is made every year for works to be carried out directly under the orders of Government in accordance with the instructions conveyed in para 8 of Government Order No. 221-5/Ml. 51-14-63 dated the 12th July 1915.

Port
Put up - Flags

(iii) A lump sum of Rs. 33,000/- is provided annually for establishment and other incidental recurring charges such as purchase of tools and plant, printing charges etc.

(iv) The maintenance of and repairs to completed works of the Board till they are taken over charge of by the Municipality is a recurring item of expenditure A sum of Rs. 3,000/- every year is provided to meet it

(v) It may so happen that on grounds of special importance the execution of certain works not specially mentione in the programme will be required to be urgently undertaken by the Board,

(22

either on its own initiative or upon the suggestions of the Municipal Council or under the orders of Government. In order to finance such urgent works without disturbance to allotments for other sanctioned or comtemplated works of the year a sum of Rs. 15,000/- is set apart every year. In the eventuality of there existing no necessity for utilising this provision either in full or in part for the said purpose, the same will be available for appropriation to other budgetted works of the year, thus reducing the balance of the estimated amount for future expenditure to that extent

This is a new suggestion for sanction.

(vi) The above 5 items of recurring charges for the incurring of which, the sanction of Government will of course be obtained year to year, make up a total of Rs. 2,76,000/- per annum This being deducted from the annual grant of R . 4½ lakhs there will be left only Rs. 1,74,000/- for distribution among other works to be provided for in the usual way

2,00,000
25,000
32,000
3,000
15,000
2,76,000 ✗
4,50,000
2,76,000
1,74,000

These works are of various kinds and some of them are large ones. Generally viewed excepting a few, each of them is urgent in its own way, requiring early completion in the interest of economy and convenience to the public At any rate, we can afford to run the building works on this a number of years. Therefore, saving

(23

the work of Improving the Mandi Market which is a legitimate work of the Municipality and the cost of which has been ordered to be advanced from the Trust Board funds, the building works are all intended to be completed within 3 years (i.e.,) by the end of the official year 1920-21. Provision is accordingly made in the Programme for the 4 larger works of this class.

(vii) Regarding the works relating to the aesthetical improvements of the City the planting of avenues is the principal one Provision has been made for fully working out the comprehensive scheme sanctioned for this work in Government Order No. 7705-7 dated the 7th June 1917, within the 3 years ending 1920-21 The other two small works of improving the junctions of certain roads are also intended to be completed within the same period, and provision is accordingly made in the Programme

The laying out of the Bamboo bazaar grounds being a very urgent work, it is proposed to be completed during the current official year the full amount of the estimate being provided for the same

The provision Rs 15 000 for the 3rd year under the "Chamundi Extension" is for payment being made to the Water Supply Department for laying mains for the water supply --

(24)

~~Water Supply Department for buying~~ for the water supply to this extension and for completing sundry other works connected with it.

(ix) Of the miscellaneous works, "Water supply connections to finish tanks and latrines" is an important one in view of the efficient working of the underground sewerage system on which a large outlay has already been incurred The estimate for this work was sanctioned recently in Public Works Secretar 's letter No. 1435-39 dated the 27th June 1918. Due provision made for working out the estimate in 4 years commencing from 1919-20

The work of dismatling the Eastern Fort wall can, it is considered, afford to wait, till the clearance of the existing properties in the Fort reaches completion. If this cannot be done, it may be carried out, meeting the cost from the special grant of Rs. 25,000/- allotted yearly.

(x) So long as the building and other works referred to above require preferential attention as explained above, and due provision for the completion of the same within at least 3 years is found expedient, not more than 62 to 67 thousands of rupees can be released per year out of annual grant of Rs. 4½ lakhs for the 3 years ending 1920-21 for the acquisition of properties in parts of

(25

of the city other than the Fort, and for underground sewerage works which are essentially required for removing the congestion in the City and carrying out sanitary improvements. Under the sanctioned estimates for these works each of which ~~has~~ comprises ~~are~~ several parts, there are heavy balances still to work out, Rs. 5,76,000/- under the former (acquisition works) head and Rs. 2,82,000 under the latter (underground sewerage works). Though this would justify the utilisation of the above said balance of 62-77 thousand rupees out of the annual grant of 4~~½~~ lakhs of rupees for any one only of the above two classes of work in view to its more rapid completion, yet it is considered advisable from several stand-points of view that the said two works should go apace, the slow rate of progress in either class of works and the consequent deterrent effects being overlooked Hence the amount remaining after provision being made for other works, mentioned under (i) to (ix) out of the annual grant of Rs 4½ lakhs during each of the 5 years ending 1920-21 is distributed between these two classes of works (acquisition and drainage) in the proportion of 60 40

(2) A similar distribution is made also for the subsequent year 1921-- when the funds releasable from the annual grant will amount to a larger

(26)

figure viz., about Rs. 1,50,000/- or about double the amount available in the 3 preceeding years. The acquisition and drainage may go on more rapidly in that year.

(b) For the 5th year (i.e.,) 1922-23 the available balance of grant proposed to be distributed equally between the 2 classes of works.

(xi) No attempt is made in the programme to allot funds for each of the subheads of acquisition and laying pipes sewers, as it is found by experience that an acquisition forecast is hard to be kept up to, as the sanctioned estimates do not represent the actual amount required to be paid under the existing conditions of steady rises in the value of land and properties as the completion of acquisition of intended properties cannot be secured, in some cases, timely, owing to the complicacy of rival claims on the property, the difficulty in determining their ownership, and as the objection of interested persons to part with part properties notified for acquisition requires time to be got over

In most localities the progress of laying pipe sewers necessarily depends upon the acquisition of properties in those areas

Hence, provision is made in the

(47

in the forecast under acquisition and sewerage works under the comprehensive heads only, the details being intended to be supplied in the annual budget of expenditure, in consideration of the prospective circumstances of each year.

8 According to the modified programme submitted herewith which has received the approval of the Board of Trustees in their meeting dated the 29th July 1918 (copy of their resolution on the subject is appended for easy reference) works costing Rs. 18,58,200/- can be executed within the 5 years ending 1922-23

Result + Vide Resolution XX (Flag W)

Out of the amount of Rs. 22,55,000/- remaining at the commencement of the current official year to be incurred on account of sanctioned works, there will be still left to be worked out in the subsequent year 1923-24 a sum of Rs. 3,50,600/- in the sanctioned works alone in addition to defraying the usual recurring charges amounting to Rs. 76,000/-. In other words, the Government will have to kirdly sanction a grant of not less than Rs 4½ lakhs for the year 1923 -24 also, in order that all the estimates sanctioned up to the middle of July 1918 may be completely worked out by the end of 1923-24

* may be taken up in current year

9. It may be noted in this connection that apart from the sanctioned schemes referred to in the previous paragraphs there are other improvement projects passed by the Board, which are either awaiting the sanction of Government or are under submission for sanction.

These projects in number) estimated to

to cost Rs. 15,62,400 are noted in the appended statement (B-). These include estimates amounting to Rs. 2,25,000/- and Rs. 3,53,000/- respectively, for laying pipe sewers in Nos. 1 and II Drainage Areas, which are parts of the complete system of underground sewer pipes for the whole City included in the Comprehensive Programme of March 1912, approved by Government

G.O. 6831-5 Mil 186-11-7 dt 21-3-12 (illegible)

The other works in this statement are necessary to be taken up sooner or later in the interests of the further improvements of the city.

After receipt of orders as to the continuance or otherwise of the grant of Rs. 4½ lakhs by Government from the year 1924-25, a similar programme for these works will be prepared and submitted for orders.

This does not seem advisable for the present

10. In a progressive City like Mysore, which is the capital of the State and the place of residence of His Highness the Maharaja and wherein are springing up under promising conditions several activities such as those connected with Education, Industries and Railways, no finality can be fixed as to the future improvements needed. The requirements will suggest themselves from time to time as the said activities develop and some of them may in the order of execution take precedence ~~procedure~~ over the works for which estimates have been already prepared by the Board. Generally speaking it is towards the opening of new extensions that attention has to be paid and this will be kept in view
